

Aqua-Chi detox foot bath at Vibrant Health

LIVE BLOOD CELL ANALYSIS WITH THE AQUA-CHI FOOT BATH

< Before

After >

The live blood cell analysis pictures above were taken before and after a thirty five minute Aqua-Chi ionic foot bath detox soak. The photo on the left shows the subject's live blood cells before the foot bath. Before the Aqua Chi foot detox the blood was sticky, dark, and the blood cells were clumped together. The picture to the right shows the same subject's blood cells and the amazing difference just 35 minutes later, after the Aqua Chi foot bath. Amazingly, the red blood cells were rounder, energetic and more full of life.
